EDG AWARDED 2004 AERIE AWARD FROM TRANE

EDG is Environmental Dynamics Group, manufacturer of Dynamic Air Cleaners® since 1992.

PRINCETON, (NJ) – Oct. 28, 2004 – Environmental Dynamics Group has been named a "Supplier of the Year" for Trane, the climate control business of American Standard Companies, a leading global provider of indoor comfort systems and comprehensive facility solutions.

Martin Cummins, EDG chief operating officer, was presented the "2004 Aerie Award" during a ceremony earlier this year. EDG was chosen from among twenty leading Trane suppliers with product quality, delivery, price, service and access to technology giving them the highest overall score. Competing suppliers were rated on a 100-point performance scale based on data from Trane buyer and seller records. Performance evaluation includes product quality, delivery, service and technical support.

Princeton, New Jersey based EDG supplies Trane with electronic air cleaners and condensate drain pan treatments used in residential and commercial heating and cooling systems.

3 – Dynamic Air Cleaners

Environmental Dynamics Group manufactures high-performance electronic “Panel” air cleaners. Dynamic Air Cleaners offers a unique, patented design utilizing an activated carbon center screen that allows for installation in a space as narrow as 1”, such as a filter rack or return air grille, and with performance that captures dangerous sub-micron particles (97.4% at .3 microns) including smoke and lung damaging dust. Dynamic Air Cleaners offer homeowners commercial-grade technology at affordable prices.

In addition to the company’s popular 1” Dynamic Air Cleaners, EDG also manufactures Dynamic V-Bank Air Cleaners for commercial air handlers and the patented Dynamic Sterile Sweep UV-C Germicidal System. The company also distributes Dynamic Pan Treatments for condensate drain pans. For more information, please contact Peter Healy at 800-578-7873.

4 – About Environmental Dynamics Group

Environmental Dynamics Group is a wholly owned subsidiary of Environmental Management Confederation (EMC), Inc. of Princeton, New Jersey. EMC also owns and operates Engineering Dynamics, Ltd. (EDL) of Carleton Place, Ontario where the company’s manufacturing and R&D operations are located. The company operates ten regional sales offices across the United States to provide technical and sales support through its distribution network.

-more-

Environmental Dynamics Group manufactures and distributes innovative indoor air quality products including electronic air cleaners, UV-C germicidal systems, and condensate pan treatments for residential and commercial applications. The company's products are used in applications that range from hospitals and embassies to restaurants and casinos.

“Our company's mission is to develop and bring to market innovative, technologically-advanced and affordable solutions that assist our customers in addressing air quality and environmental issues,” according to Duke Wiser, the company's president.
